The re-priced transaction amount is the better of [a] the cost-plus price or [b] the posted cash price less the cents-off discount, whichever is lower. The cost-plus price is calculated by QFN based on OPIS Contract Rack Averages for the previous business day plus freight, applicable taxes, and the cost-plus fee [Merchant's margin] as agreed to by the Merchant and QFN. QFN will calculate the daily cost-plus price and transmit the price and minimum discount to WEX/FleetOne for each fuel stop. Any pricing issue or discrepancy must be addressed first with QFN.
